PROJECTS

Memoranda GitGet *Java, Git, XML* <https://github.com/ser316asu-2018/braunfels>
Project using Agile methodology to enhance the open-source project "Memoranda", implementing statistics and project tracking through the GitHub API. Met and coordinated with team to meet sprint goals. Received an A grade.

Axelrod *Python, Git* <https://github.com/Axelrod-Python/Axelrod>
Implemented new methods and strategies to improve the open-source project Axelrod, a Python library devoted to research of the "Prisoner's Dilemma".

Mars Rover Simulation *Python, Bash, Apache2*
A project to design, build, and implement code necessary for a robot that could be controlled over the internet from school classrooms as a educational activity. Increased revenue and client interest in company programs.

Sakai Progress Tool *Java Spring, MySQL, Thymeleaf, Javascript, Linux*
<https://github.com/jmross14/sakai>
Feature update to the Sakai learning management system to implement new MVC components necessary to show instructor and student views of relevant course progress data. Increases product value to generate interest in client's support services.

EVENTS

Presenter - Sakai Virtual Conference 2018
Presented at Sakai Virtual Conference 2018 to demonstrate Sakai Progress Tool design and future plans for the project to the Sakai community
November 2018
